Java

Program: Java

Title: Java

Prerequisites: Basic Computer Skills

Certifications Upon Completion: Certificate of Completion

Length of Course: 200 Hours

PRICE: \$4500

COURSE OBJECTIVE:

It is an object-oriented language similar to C++, but with advanced and simplified features. Java is **free to access** and can **run on all platforms**.

- **Concurrent** where you can execute many statements instead of sequentially executing it.
- **Class-based** and an **object-oriented** programming language.
- **Independent** programming language that follows the logic of “**Write once, Run anywhere**” i.e. the compiled code can run on all platforms which supports java.

In simple words, it is a computing platform where you can develop applications. You may go through this Java Course where our **Java Certification Training** expert explains the topics in a detailed manner with examples which will help you to understand the concepts better.

PROGRAM DESCRIPTION:

This course prepares individuals to successfully use the software and apply to a job.

INSTRUCTIONAL STRATEGIES:

Our institution has developed its own e-learning platform (www.tutoracademy.org) together with a combination of class lectures, hands on with a computer, one on one demonstrations, and in-house lab experiences applicants can accomplish certification.

PROGRAM LENGTH

The following hours are recommended program lengths. It is understood, however, each student learns at his or her individual pace and there will be students who successfully complete the program in fewer or more hours than what is recommended.

METHOD OF EVALUATION

Our onsite testing program through (Pearson Vue) will evaluate and certify each candidate, reports will be produced to assist candidates in becoming certified.
